

# Unit 7: Religion

Why do sociologists study religion? For centuries, humankind has sought to understand and explain the “meaning of life.” Many philosophers believe this contemplation and the desire to understand our place in the universe are what differentiate humankind from other species. Religion, in one form or another, has been found in all human societies since human societies first appeared. Archaeological digs have revealed ritual objects, ceremonial burial sites, and other religious artifacts. Social conflict and even wars often result from religious disputes. To understand a culture, sociologists must study its religion.

What is religion? Pioneer sociologist Emile Durkheim described it with the ethereal statement that it consists of “things that surpass the limits of our knowledge” (1915). He went on to elaborate: Religion is “a unified system of beliefs and practices relative to sacred things, that is to say set apart and forbidden, beliefs and practices which unite into one single moral community, called a church, all those who adhere to them” (1915). Some people associate religion with places of worship (a synagogue or church), others with a practice (confession or meditation), and still others with a concept that guides their daily lives (like dharma or sin). All of these people can agree that religion is a system of beliefs, values, and practices concerning what a person holds sacred or considers to be spiritually significant.

Religion can also serve as a filter for examining other issues in society and other components of a culture. For example, after the terrorist attacks of September 11, 2001, it became important for teachers, church leaders, and the media to educate Americans about Islam to prevent stereotyping and to promote religious tolerance. Sociological tools and methods, such as surveys, polls, interviews, and analysis of historical data, can be applied to the study of religion in a culture to help us better understand the role religion plays in people’s lives and the way it influences society.

## The Sociological Approach to Religion

From the Latin *religio* (respect for what is sacred) and *religare* (to bind, in the sense of an obligation), the term religion describes various systems of belief and practice concerning what people determine to be sacred or spiritual (Fasching and deChant 2001; Durkheim 1915). Throughout history, and in societies across the world, leaders have used religious narratives, symbols, and traditions in an attempt to give more meaning to life and understand the universe. Some form of religion is found in every known culture, and it is usually practiced in a public way by a group. The practice of religion can include feasts and festivals, God or gods, marriage and funeral services, music and art, meditation or initiation, sacrifice or service, and other aspects of culture.

While some people think of religion as something individual because religious beliefs can be highly personal, religion is also a social institution. Social scientists recognize that religion exists as an organized and integrated set of beliefs, behaviors, and norms centered on basic social needs and values. Moreover, religion is a cultural universal found in all social groups. For

instance, in every culture, funeral rites are practiced in some way, although these customs vary between cultures and within religious affiliations. Despite differences, there are common elements in a ceremony marking a person's death, such as announcement of the death, care of the deceased, disposition, and ceremony or ritual. These universals, and the differences in how societies and individuals experience religion, provide rich material for sociological study.

In studying religion, sociologists distinguish between what they term the experience, beliefs, and rituals of a religion. Religious experience refers to the conviction or sensation that one is connected to "the divine." This type of communion might be experienced when people are praying or meditating. Religious beliefs are specific ideas that members of a particular faith hold to be true, such as that Jesus Christ was the son of God, or believing in reincarnation. Another illustration of religious beliefs is that different religions adhere to certain stories of world creation. Religious rituals are behaviors or practices that are either required or expected of the members of a particular group, such as bar mitzvah or confession (Barkan and Greenwood 2003).

## **The History of Religion as a Sociological Concept**

In the wake of 19th century European industrialization and secularization, three social theorists attempted to examine the relationship between religion and society: Émile Durkheim, Max Weber, and Karl Marx. They are among the founding thinkers of modern sociology.

As stated earlier, French sociologist Émile Durkheim (1858–1917) defined religion as a "unified system of beliefs and practices relative to sacred things" (1915). To him, sacred meant extraordinary—something that inspired wonder and which seemed connected to the concept of "the divine." Durkheim argued that "religion happens" in society when there is a separation between the profane (ordinary life) and the sacred (1915). A rock, for example, isn't sacred or profane as it exists. But if someone makes it into a headstone, or another person uses it for landscaping, it takes on different meanings—one sacred, one profane.

Durkheim is generally considered the first sociologist who analyzed religion in terms of its societal impact. Above all, Durkheim believed that religion is about community: It binds people together (social cohesion), promotes behavior consistency (social control), and offers strength for people during life's transitions and tragedies (meaning and purpose). By applying the methods of natural science to the study of society, he held that the source of religion and morality is the collective mind-set of society and that the cohesive bonds of social order result from common values in a society. He contended that these values need to be maintained to maintain social stability.

But what would happen if religion were to decline? This question led Durkheim to posit that religion is not just a social creation but something that represents the power of society: When people celebrate sacred things, they celebrate the power of their society. By this reasoning, even if traditional religion disappeared, society wouldn't necessarily dissolve.

Whereas Durkheim saw religion as a source of social stability, German sociologist and political economist Max Weber (1864–1920) believed it was a precipitator of social change. He examined the effects of religion on economic activities and noticed that heavily Protestant societies—such as those in the Netherlands, England, Scotland, and Germany—were the most highly developed capitalist societies and that their most successful business leaders were Protestant. In his writing *The Protestant Work Ethic and the Spirit of Capitalism* (1905), he contends that the Protestant work ethic influenced the development of capitalism. Weber noted that certain kinds of

Protestantism supported the pursuit of material gain by motivating believers to work hard, be successful, and not spend their profits on frivolous things. (The modern use of “work ethic” comes directly from Weber’s Protestant ethic, although it has now lost its religious connotations.)

German philosopher, journalist, and revolutionary socialist Karl Marx (1818–1883) also studied the social impact of religion. He believed religion reflects the social stratification of society and that it maintains inequality and perpetuates the status quo. For him, religion was just an extension of working-class (proletariat) economic suffering. He famously argued that religion is “is the opium of the people” (1844).

For Durkheim, Weber, and Marx, who were reacting to the great social and economic upheaval of the late 19th century and early 20th century in Europe, religion was an integral part of society. For Durkheim, religion was a force for cohesion that helped bind the members of society to the group, while Weber believed religion could be understood as something separate from society. Marx considered religion inseparable from the economy and the worker. Religion could not be understood apart from the capitalist society that perpetuated inequality. Despite their different views, these social theorists all believed in the centrality of religion to society.

## **Theoretical Perspectives on Religion**

Modern-day sociologists often apply one of three major theoretical perspectives. These views offer different lenses through which to study and understand society: functionalism, symbolic interactionism, and conflict theory. Let’s explore how scholars applying these paradigms understand religion.

### **Functionalism**

Functionalists contend that religion serves several functions in society. Religion, in fact, depends on society for its existence, value, and significance, and vice versa. From this perspective, religion serves several purposes, like providing answers to spiritual mysteries, offering emotional comfort, and creating a place for social interaction and social control.

In providing answers, religion defines the spiritual world and spiritual forces, including divine beings. For example, it helps answer questions like “How was the world created?” “Why do we suffer?” “Is there a plan for our lives?” and “Is there an afterlife?” As another function, religion provides emotional comfort in times of crisis. Religious rituals bring order, comfort, and organization through shared familiar symbols and patterns of behavior.

One of the most important functions of religion, from a functionalist perspective, is the opportunities it creates for social interaction and the formation of groups. It provides social support and social networking, offering a place to meet others who hold similar values and a place to seek help (spiritual and material) in times of need. Moreover, it can foster group cohesion and integration. Because religion can be central to many people’s concept of themselves, sometimes there is an “in group” versus “out group” feeling toward other religions in our society or within a particular practice. On an extreme level, the Inquisition, the Salem witch trials, and anti-Semitism are all examples of this dynamic. Finally, religion promotes social control: It reinforces social norms such as appropriate styles of dress, following the law, and regulating sexual behavior.

## **Conflict Theory**

Conflict theorists view religion as an institution that helps maintain patterns of social inequality. For example, the Vatican has a tremendous amount of wealth, while the average income of Catholic parishioners is small. According to this perspective, religion has been used to support the “divine right” of oppressive monarchs and to justify unequal social structures, like India’s caste system.

Conflict theorists are critical of the way many religions promote the idea that one should be satisfied with existing circumstances because they are divinely ordained. This power dynamic has been used by Christian institutions for centuries to keep poor people poor, teaching them that they shouldn’t be concerned with what they lack because their “true” reward (from a religious perspective) will come after death. Conflict theorists also point out that those in power in a religion are often able to dictate practices, rituals, and beliefs through their interpretation of religious texts or via proclaimed direct communication from the divine.

The feminist perspective is a conflict theory view that focuses specifically on gender inequality. In terms of religion, feminist theorists assert that, although women are typically the ones to socialize children into a religion, they have traditionally held very few positions of power within religions. A few religions and religious denominations are more gender equal, but male dominance remains the norm of most.

## **Symbolic Interactionism**

Rising from the concept that our world is socially constructed, symbolic interactionism studies the symbols and interactions of everyday life. To interactionists, beliefs and experiences are not sacred unless individuals in a society regard them as sacred. The Star of David in Judaism, the cross in Christianity, and the crescent and star in Islam are examples of sacred symbols. Interactionists are interested in what these symbols communicate. Additionally, because interactionists study one-on-one everyday interactions between individuals, a scholar using this approach might ask questions focused on this dynamic. The interaction between religious leaders and practitioners, the role of religion in the banal components of everyday life, and the ways people express religious values in social interactions—all might be topics of study to an interactionist.

# **World Religions**

---

The major religions of the world (Hinduism, Buddhism, Islam, Confucianism, Christianity, Taoism, and Judaism) differ in many respects, including how each religion is organized and the belief system each upholds. Other differences include the nature of belief in a higher power, the history of how the world and the religion began, and the use of sacred texts and objects.

## **Types of Religious Organizations**

Religions organize themselves—their institutions, practitioners, and structures—in a variety of fashions. For instance, when the Roman Catholic Church emerged, it borrowed many of its

organizational principles from the ancient Roman military, turning senators into cardinals, for example. Sociologists use different terms, like ecclesia, denomination, and sect, to define these types of organizations. Scholars are also aware that these definitions are not static. Most religions transition through different organizational phases. For example, Christianity began as a cult, transformed into a sect, and today exists as an ecclesia.

Cults, like sects, are new religious groups. In modern America this term often carries pejorative connotations. However, almost all religions began as cults and gradually progressed to levels of greater size and organization. The term cult is sometimes used interchangeably with the term new religious movement (NRM). In its pejorative use, these groups are often disparaged as being secretive, highly controlling of members' lives, and dominated by a single, charismatic leader.

Controversy exists over whether some groups are cults, perhaps due in part to media sensationalism over groups like polygamous Mormons or the Peoples Temple followers who died at Jonestown, Guyana. Some groups that are controversially labeled as cults today include the Church of Scientology and the Hare Krishna movement.

A sect is a small and relatively new group. Most of the well-known Christian denominations in the United States today began as sects. For example, the Methodists and Baptists protested against their parent Anglican Church in England, just as Henry VIII protested against the Catholic Church by forming the Anglican Church. From "protest" comes the term Protestant.

Occasionally, a sect is breakaway group that may be in tension with larger society. They sometimes claim to be returning to "the fundamentals" or to contest the veracity of a particular doctrine. When membership in a sect increases over time, it may grow into a denomination. Often a sect begins as an offshoot of a denomination, when a group of members believes they should separate from the larger group.

Some sects dissolve without growing into denominations. Sociologists call these established sects. Established sects, such as the Amish or Jehovah's Witnesses fall halfway between sect and denomination on the ecclesia–cult continuum because they have a mixture of sect-like and denomination-like characteristics.

A denomination is a large, mainstream religious organization, but it does not claim to be official or state sponsored. It is one religion among many. For example, Baptist, African Methodist Episcopal, Catholic, and Seventh-day Adventist are all Christian denominations.

The term ecclesia, originally referring to a political assembly of citizens in ancient Athens, Greece, now refers to a congregation. In sociology, the term is used to refer to a religious group that most all members of a society belong to. It is considered a nationally recognized, or official, religion that holds a religious monopoly and is closely allied with state and secular powers. The United States does not have an ecclesia by this standard; in fact, this is the type of religious organization that many of the first colonists came to America to escape.

One way to remember these religious organizational terms is to think of cults, sects, denominations, and ecclesia representing a continuum, with increasing influence on society, where cults are least influential and ecclesia are most influential.

## **Types of Religions**

Scholars from a variety of disciplines have strived to classify religions. One widely accepted categorization that helps people understand different belief systems considers what or who people worship (if anything). Using this method of classification, religions might fall into one of these basic categories, as shown in [Table](#).

One way scholars have categorized religions is by classifying what or who they hold to be divine.

<b>Religious Classification</b>	<b>What/Who Is Divine</b>	<b>Example</b>
Polytheism	Multiple gods	Ancient Greeks and Romans
Monotheism	Single god	Judaism, Islam
Atheism	No deities	Atheism
Animism	Nonhuman beings (animals, plants, natural world)	Indigenous nature worship (Shinto)
Totemism	Human-natural being connection	Ojibwa (Native American)

Note that some religions may be practiced—or understood—in various categories. For instance, the Christian notion of the Holy Trinity (God, Jesus, Holy Spirit) defies the definition of monotheism to some scholars. Similarly, many Westerners view the multiple manifestations of Hinduism’s godhead as polytheistic, while Hindus might describe those manifestations as a monotheistic parallel to the Christian Trinity.

It is also important to note that every society also has nonbelievers, such as atheists, who do not believe in a divine being or entity, and agnostics, who hold that ultimate reality (such as God) is unknowable. While typically not an organized group, atheists and agnostics represent a significant portion of the population. It is important to recognize that being a nonbeliever in a divine entity does not mean the individual subscribes to no morality. Indeed, many Nobel Peace Prize winners and other great humanitarians over the centuries would have classified themselves as atheists or agnostics.

## **The World’s Religions**

Religions have emerged and developed across the world. Some have been short-lived, while others have persisted and grown. In this section, we will explore seven of the world’s major religions.

### **Hinduism**

The oldest religion in the world, Hinduism originated in the Indus River Valley about 4,500 years ago in what is now modern-day northwest India and Pakistan. It arose contemporaneously with ancient Egyptian and Mesopotamian cultures. With roughly 1 billion followers, Hinduism is the third-largest of the world’s religions. Hindus believe in a divine power that can manifest as different entities. Three main incarnations—Brahma, Vishnu, and Shiva—are sometimes compared to the manifestations of the divine in the Christian Trinity.

Multiple sacred texts, collectively called the Vedas, contain hymns and rituals from ancient India and are mostly written in Sanskrit. Hindus generally believe in a set of principles called dharma, which refer to one’s duty in the world that corresponds with “right” actions. Hindus also believe

in karma, or the notion that spiritual ramifications of one's actions are balanced cyclically in this life or a future life.

## **Buddhism**

Buddhism was founded by Siddhartha Gautama around 500 B.C.E. Siddhartha was said to have given up a comfortable, upper-class life to follow one of poverty and spiritual devotion. At the age of 35, he famously meditated under a sacred fig tree and vowed not to rise before he achieved enlightenment (*bodhi*). After this experience, he became known as Buddha, or “enlightened one.” Followers were drawn to Buddha's teachings and the practice of meditation, and he later established a monastic order.

Buddha's teachings encourage Buddhists to lead a moral life by accepting the four Noble Truths: 1) life is suffering, 2) suffering arises from attachment to desires, 3) suffering ceases when attachment to desires ceases, and 4) freedom from suffering is possible by following the “middle way.” The concept of “middle way” is central to Buddhist thinking, which encourages people to live in the present and to practice acceptance of others (Smith 1991). Buddhism also tends to deemphasize the role of a godhead, instead stressing the importance of personal responsibility (Craig 2002).

## **Confucianism**

Confucianism was the official religion of China from 200 B.C.E. until it was officially abolished when communist leadership discouraged religious practice in 1949. The religion was developed by Kung Fu-Tzu (Confucius), who lived in the sixth and fifth centuries B.C.E. An extraordinary teacher, his lessons—which were about self-discipline, respect for authority and tradition, and *jen* (the kind treatment of every person)—were collected in a book called the *Analects*.

Some religious scholars consider Confucianism more of a social system than a religion because it focuses on sharing wisdom about moral practices but doesn't involve any type of specific worship; nor does it have formal objects. In fact, its teachings were developed in context of problems of social anarchy and a near-complete deterioration of social cohesion. Dissatisfied with the social solutions put forth, Kung Fu-Tzu developed his own model of religious morality to help guide society (Smith 1991).

## **Taoism**

In Taoism, the purpose of life is inner peace and harmony. Tao is usually translated as “way” or “path.” The founder of the religion is generally recognized to be a man named Laozi, who lived sometime in the sixth century B.C.E. in China. Taoist beliefs emphasize the virtues of compassion and moderation.

The central concept of *tao* can be understood to describe a spiritual reality, the order of the universe, or the way of modern life in harmony with the former two. The ying-yang symbol and the concept of polar forces are central Taoist ideas (Smith 1991). Some scholars have compared this Chinese tradition to its Confucian counterpart by saying that “whereas Confucianism is concerned with day-to-day rules of conduct, Taoism is concerned with a more spiritual level of being” (Feng and English 1972).

## **Judaism**

After their Exodus from Egypt in the 13th century B.C.E., Jews, a nomadic society, became monotheistic, worshipping only one God. The Jews' covenant, or promise of a special relationship with Yahweh (God), is an important element of Judaism, and their sacred text is the Torah, which Christians also follow as the first five books of the Bible. Talmud refers to a collection of sacred Jewish oral interpretation of the Torah. Jews emphasize moral behavior and action in this world as opposed to beliefs or personal salvation in the next world.

## **Islam**

Islam is monotheistic religion and it follows the teaching of the prophet Muhammad, born in Mecca, Saudi Arabia, in 570 C.E. Muhammad is seen only as a prophet, not as a divine being, and he is believed to be the messenger of Allah (God), who is divine. The followers of Islam, whose U.S. population is projected to double in the next 20 years (Pew Research Forum 2011), are called Muslims.

Islam means “peace” and “submission.” The sacred text for Muslims is the Qur'an (or Koran). As with Christianity's Old Testament, many of the Qur'an stories are shared with the Jewish faith. Divisions exist within Islam, but all Muslims are guided by five beliefs or practices, often called “pillars”: 1) Allah is the only god and Muhammad is his prophet, 2) daily prayer, 3) helping those in poverty, 4) fasting as a spiritual practice, and 5) pilgrimage to the holy center of Mecca.

## **Christianity**

Today the largest religion in the world, Christianity began 2,000 years ago in Palestine, with Jesus of Nazareth, a charismatic leader who taught his followers about *caritas* (charity) or treating others as you would like to be treated yourself.

The sacred text for Christians is the Bible. While Jews, Christians, and Muslims share many of same historical religious stories, their beliefs verge. In their shared sacred stories, it is suggested that the son of God—a messiah—will return to save God's followers. While Christians believe that he already appeared in the person of Jesus Christ, Jews and Muslims disagree. While they recognize Christ as an important historical figure, their traditions don't believe he's the son of God, and their faiths see the prophecy of the messiah's arrival as not yet fulfilled.

Different Christian groups have variations among their sacred texts. For instance, Mormons, an established Christian sect, also use the Book of Mormon, which they believe details other parts of Christian doctrine and Jesus' life that aren't included in the Bible. Similarly, the Catholic Bible includes the Apocrypha, a collection that, while part of the 1611 King James translation, is no longer included in Protestant versions of the Bible. Although monotheistic, Christians often describe their god through three manifestations that they call the Holy Trinity: the father (God), the son (Jesus), and the Holy Spirit. The Holy Spirit is a term Christians often use to describe religious experience, or how they feel the presence of the sacred in their lives. One foundation of Christian doctrine is the Ten Commandments, which decry acts considered sinful, including theft, murder, and adultery.

# Religion in the United States

---

In examining the state of religion in the United States today, we see the complexity of religious life in our society, plus emerging trends like the rise of the megachurch, secularization, and the role of religion in social change.

## **Religion and Social Change**

Religion has historically been an impetus to social change. The translation of sacred texts into everyday, non-scholarly language empowered people to shape their religions. Disagreements between religious groups and instances of religious persecution have led to wars and genocides. The United States is no stranger to religion as an agent of social change. In fact, our nation's first European arrivals were acting largely on religious convictions when they were compelled to settle in America.

## **Liberation Theology**

Liberation theology began as a movement within the Roman Catholic Church in the 1950s and 1960s in Latin America, and it combines Christian principles with political activism. It uses the church to promote social change via the political arena, and it is most often seen in attempts to reduce or eliminate social injustice, discrimination, and poverty. A list of proponents of this kind of social justice (although some pre-date liberation theory) could include Francis of Assisi, Leo Tolstoy, Martin Luther King Jr., and Desmond Tutu.

Although begun as a moral reaction against the poverty caused by social injustice in that part of the world, today liberation theology is an international movement that encompasses many churches and denominations. Liberation theologians discuss theology from the point of view of the poor and the oppressed, and some interpret the scriptures as a call to action against poverty and injustice. In Europe and North America, feminist theology has emerged from liberation theology, as a movement to bring social justice to women.

## **Megachurches**

A megachurch is a Christian church that has a very large congregation averaging more than 2,000 people who attend regular weekly services. As of 2009, the largest megachurch in the United States was in Houston Texas, boasting an average weekly attendance of more than 43,000 (Bogan 2009). Megachurches exist in other parts of the world, especially in South Korea, Brazil, and several African countries, but the rise of the megachurch in the United States is a fairly recent phenomenon that has developed primarily in California, Florida, Georgia, and Texas.

Since 1970 the number of megachurches in this country has grown from about 50 to more than 1,000, most of which are attached to the Southern Baptist denomination (Bogan 2009). Approximately 6 million people are members of these churches (Bird and Thumma 2011). The architecture of these church buildings often resembles a sport or concert arena. The church may

include jumbotrons (large-screen televisual technology usually used in sports arenas to show close-up shots of an event). Worship services feature contemporary music with drums and electric guitars and use state-of-the-art sound equipment. The buildings sometimes include food courts, sports and recreation facilities, and bookstores. Services such as child care and mental health counseling are often offered.

Typically, a single, highly charismatic pastor leads the megachurch; at present, all are male. Some megachurches and their preachers have a huge television presence, and viewers all around the country watch and respond to their shows and fundraising.

Besides size, U.S. megachurches share other traits, including conservative theology, evangelism, use of technology and social networking (Facebook, Twitter, podcasts, blogs), hugely charismatic leaders, few financial struggles, multiple sites, and predominantly white membership. They list their main focuses as youth activities, community service, and study of the Scripture (Hartford Institute for Religion Research b).

Critics of megachurches believe they are too large to promote close relationships among fellow church members or the pastor, as could occur in smaller houses of worship. Supporters note that, in addition to the large worship services, congregations generally meet in small groups and some megachurches have informal events throughout the week to allow for community-building (Hartford Institute for Religion Research a).

## **Secularization**

Historical sociologists Émile Durkheim, Max Weber, and Karl Marx and psychoanalyst Sigmund Freud anticipated secularization, claiming that the modernization of society would bring about a decrease in the influence of religion. Weber believed membership in distinguished clubs would outpace membership in Protestant sects as a way for people to gain authority or respect.

Conversely, some people contend that secularization is a root cause of many social problems, such as divorce, drug use, and educational downturn. Presidential contender Michele Bachmann even linked Hurricane Irene and the 2011 earthquake felt in Washington D.C. to politicians' failure to listen to God (Ward 2011).

While some scholars see the United States becoming increasingly secular, others observe a rise in fundamentalism. Compared to other democratic, industrialized countries, the U.S. is generally perceived to be a fairly religious nation. Whereas 65 percent of Americans in a 2009 Gallup survey said religion was an important part of their daily lives, the numbers were lower in Spain (49 percent), Canada (42 percent), France (30 percent), the United Kingdom (27 percent), and Sweden (17 percent) (Crabtree and Pelham 2009). Secularization interests social observers because it entails a pattern of change in a fundamental social institution.

## **Thank God for That Touchdown: Separation of Church and State**

Imagine three public universities with football games scheduled on Saturday. At University A, a group of students in the stands who share the same faith decide to form a circle amid the spectators to pray for the team. For 15 minutes, people in the circle share their prayers aloud among their group. At University B, the team ahead at halftime decides to join together in prayer, giving thanks and seeking support from God. This lasts for the first 10 minutes of halftime on the sidelines of the field while spectators watch. At University C, the game program includes, among its opening moments, two minutes set aside for the team captain to share a prayer of his choosing with spectators.

In the tricky area of separation of church and state, which of these actions is allowed and which is forbidden? In these three fictional scenarios, the last example is against the law while the first two situations are perfectly acceptable.

In the United States, a nation founded on the principles of religious freedom (many settlers were escaping religious persecution in Europe), how stringently do we adhere to this ideal? How well do we respect people's right to practice any belief system of their choosing? The answer just might depend on what religion you practice.

In 2003, for example, a lawsuit escalated in Alabama regarding a monument to the Ten Commandments in a public building. In response, a poll was conducted by *USA Today*, CNN, and Gallup. Among the findings: 70 percent of people approved of a Christian Ten Commandments monument in public, while only 33 percent approved of a monument to the Islamic Qur'an in the same space. Similarly, survey respondents showed a 64 percent approval of social programs run by Christian organizations, but only 41 percent approved of the same programs run by Muslim groups (Newport 2003).

These statistics suggest that, for most Americans, freedom of religion is less important than the religion under discussion. And this is precisely the point made by those who argue for separation of church and state. According to their contention, any state-sanctioned recognition of religion suggests endorsement of one belief system at the expense of all others—contradictory to the idea of freedom of religion.

So what violates separation of church and state and what is acceptable? A myriad of lawsuits continue to contribute to the answer. In the case of the three fictional examples above, the issue of spontaneity is key, as is the existence (or lack thereof) of planning on the part of event organizers.

The next time you're at a state event—political, public school, community—and the topic of religion comes up, consider where it falls in this debate.
